JL Blade - Premium Marble Buffer

Features, Applications, Usage Guidelines

The JL Blade is a heavy-duty buffing machine designed specifically for polishing all types of natural stone surfaces, including concrete and cultured marble. Its robust design and powerful motor make it ideal for demanding polishing, stripping, sanding, scrubbing, bonneting, and cleaning tasks.

Features and Specifications

The JL Blade is equipped with:

- Premium Quality 1.5 horsepower motor designed for heavy-duty use.
- Over-built core to withstand the stresses of polishing natural stone.
- Mounted solution tank for dispensing crystallizer or cleaning/stripping solutions.
- Removable cast iron weight to adjust pressure for different tasks.
- Multiple pad holders and basic consumables included for immediate use.

We DO NOT recommend using the included weight for carpet bonneting.

Recommended Applications

The JL Blade is particularly effective for:

- Polishing natural stone floors to maintain shine and polish.
- Heavy-duty stripping jobs to remove old finishes or coatings.
- Sanding and scrubbing tasks that require powerful and consistent performance.
- Bonneting for carpets and light scrubbing when used without the weight.

JL Blade is not recommended for grinding tasks requiring grits of 400 and lower on concrete or natural stone surfaces. Instead, we recommend the [JL Bulldozer Buffer](#) for such applications..

Usage Guidelines

In order to use the JL Blade effectively and safely:

- Ensure the machine is properly assembled and all safety precautions are followed.
- Use appropriate pads and solutions as recommended for different tasks.
- Adjust the weight according to the job requirements but avoid using it for carpet bonneting.
- Avoid using the machine for grinding tasks below 400 grit; consider the JL Bulldozer for such applications.
- Regular maintenance of the machine is recommended to prolong its lifespan and ensure optimal performance.

The JL Blade is a reliable choice for professionals needing a robust and versatile marble buffer machine. With its powerful motor, adjustable weight, and included accessories, it enhances efficiency in stone polishing, stripping, and maintenance tasks. Following usage guidelines ensures safe operation and longevity of the machine, making it an essential tool for maintaining polished natural stone surfaces.
